Davenport IA 52803
(563) 324-2992

_____ Moline Diagnostic Center
1st Floor, CVM Heart Center
350 John Deere Road
Moline IL 61265
(309) 743-6700

A lower extremity arterial study is a procedure that uses blood pressure cuffs to assess the blood flow to the legs. Pressure readings are taken at different levels in the legs to determine if and where any abnormalities exist. Pressure readings are taken at rest and may be obtained again after exercise.

There is no preparation for the test. Please wear comfortable two piece clothing. You will be asked to remove your pants, socks, and shoes. The technician will perform the test while you lay on your back. The test will take approximately 75 minutes.

If you need to reschedule your test please call 24 hours in advance.
