Moline IL 61265  
(309) 743-6700

---

A radionuclide ventriculogram is a test that provides information about the heart. The test will help determine how strong your heart is and how the walls of the heart move. You will receive two injections prior to your pictures. These injections allow a special camera to take pictures of your heart.

There is no preparation for the test. The test will take approximately 60 minutes.

**If you need to reschedule your test please call 24 hours in advance.**
